PROFESSIONAL PROFILE

Information Technology student with hands-on experience building full-stack web applications using Next.js, TypeScript, and AI APIs.

Built and deployed multiple AI-powered applications with real functionality, including resume analysis and automated quiz generation systems. Strong focus on performance, clean architecture, and practical problem-solving.

Looking to apply technical skills in a real-world development environment.

SOFT SKILLS

- **Communication:** English tutor with proven student outcomes
- **Time management:** Managed 15+ sessions weekly with study commitments
- **Problem-solving:** Applied across teaching and development work
- **Adaptability:** Rapid learner across tools and environments
- **Teamwork:** Effective contributor in team settings
- **Languages:** English, Vietnamese

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, Tailwind CSS
- **Backend:** Next.js API Routes, Prisma ORM
- **Database:** PostgreSQL (Neon)
- **Tools & Technologies:** Git, GitHub, Figma, Framer Motion
- **AI Integration:** Google Gemini API, PDF parsing
- **Operating Systems:** Windows, macOS, Ubuntu (Linux), comfortable with CLI and development environment setup
- **Deployment:** Vercel
- **Networking:** Subnetting, VLANs, basic routing (Cisco Packet Tracer)

EDUCATION

Bachelor of Information Technology – Adelaide University, Australia **Jul 2024 – Present**

- Expected completion: **July 2027**
- **GPA:** 6.182/7
- **Relevant coursework:** Problem Solving and Programming (HD), Data-Driven Web Technologies (C), Object-Oriented Programming in Python (D), System Design and Realisation (HD), Software Development Practice

Bachelor of Information Technology – International University, Vietnam **Sep 2022 – Feb 2024**

- **GPA:** 2.97/4.0
- **Major:** Computer Engineering
- **Relevant Coursework:** Introduction to Computing, Object-Oriented Programming in Java, C/C++ Programming,

PROFESSIONAL EXPERIENCE

English Tutor - Vietnam **Aug 2022 – Aug 2023**

Key responsibilities

- Delivered structured lessons to 10+ students with varying skill levels
- Improved student test scores by ~20% on average
- Managed 15+ sessions per week while maintaining consistent outcomes
- Adapted teaching methods to individual learning needs

Achievements

- Drove measurable improvement in student performance, with multiple students achieving 9/10 in high school exams
- Trained students for Cambridge FLYERS exam, consistently achieving 4/5 across all sections

Projects

ResumeScope | AI-powered Resume Analyser

Dec 2025 – March 2026

- Built a full-stack web application that processes uploaded resumes and returns structured feedback in under 5 seconds
- Implemented PDF parsing and data extraction pipeline to convert unstructured documents into machine-readable input
- Designed and integrated server-side API routes to handle asynchronous AI requests efficiently
- Optimised performance through a stateless architecture, reducing server overhead and improving response time
- Developed a responsive UI with clean component structure and smooth interactions using modern React patterns
- Focused on usability with a zero-login flow to reduce friction and improve user experience
- **GitHub repository:** <https://github.com/GabenNguyen/AI-Resume-Analyser.git>
- **Live Demo:** <https://resume-scope-phi.vercel.app>

Tech Stack: Next.js, TypeScript, Tailwind CSS, Framer Motion, Gemini API

IntelliCheck | AI Quiz Generator

Nov 2025 – Jan 2026

- Developed a full-stack quiz platform generating multiple-choice questions dynamically from user-defined topics in <3 seconds per request
- Built secure authentication and session handling using Clerk, supporting persistent user sessions
- Designed relational database schema with Prisma and PostgreSQL, handling dynamic quiz storage and retrieval
- Implemented RESTful API endpoints for quiz generation, storage, and retrieval, supporting real-time content delivery
- Reduced manual quiz creation time from minutes to seconds through automated generation workflow
- Structured reusable front-end components to improve maintainability and reduce code duplication
- **GitHub repository:** <https://github.com/GabenNguyen/IntelliCheck.git>

Tech Stack: Next.js, Tailwind CSS, Framer Motion and Shadcn, PostgreSQL, Neon, Prisma, Google Gemini, Clerk, Git & GitHub

AWARDS

-
- Recipient of University of South Australia International Merit Scholarships.

Jul 2024 – Present
